

Enterprise Hotel Analytics Dashboard

KPI & DAX Measure Library

1. Purpose

This document defines the analytical measures used within the Power BI dashboard.

Measures were created using DAX to provide dynamic calculations that respond to user filters.

2. Financial Measures

Total Revenue

Description

Total income generated across all hotels, departments, channels and segments.

Total Revenue =

$\text{SUM}(\text{FactFinancials}[\text{Revenue}])$

Total Cost

Description

Total operational expenditure.

Total Cost =

$\text{SUM}(\text{FactFinancials}[\text{Cost}])$

Gross Profit

Description

Revenue remaining after operating costs.

Gross Profit =

$[\text{Total Revenue}] - [\text{Total Cost}]$

Gross Profit Margin %

Description

Measures profitability efficiency.

Formula:

Profit / Revenue

Gross Profit Margin % =

DIVIDE([Gross Profit], [Total Revenue], 0)

3. Time Intelligence Measures

Revenue Growth %

Revenue Growth % =

DIVIDE([Total Revenue]-[Revenue Previous Month], [Revenue Previous Month], 0)

4. Hotel Performance Measures

Hotel Revenue Rank

Hotel Revenue Rank =

RANKX(ALL(DimHotel[HotelName]), [Total Revenue], , DESC)

5. Department Measures

Department Profit Margin

Department Margin % =

DIVIDE([Gross Profit], [Total Revenue], 0)

Department Ranking

Department Rank =

RANKX(ALL(DimDepartment[DepartmentName]), [Total Revenue], , DESC)
